New Member Named to Wasatch County Hospital Home Health Staff

Lynda May Clyde

Lynda May Clyde has recently become the newest member of the Home Health staff at Wasatch County Hospital in Heber City.

Clyde, a respiratory technician who has been employed at Wasatch County Hospital, will be helping to coordinate duties within Home Health, Senior Life Club, Lifeline, and the Homemaker/Aid program.

In addition, she will also do some of the medical records and secretarial duties for Home Health.

Clyde is the wife of Layne Clyde of Heber and the mother of three children. *20 Apr 1988*

Family Health Fair

20 Apr 1988

A family oriented Health Fair will be held in Heber Saturday, May 7 at the middle school from 7:30 a.m. to 3:30 p.m. Successfully held in Wasatch County in previous years, this year's Health Fair will be bigger and better with a variety of screenings and tests offered by staff from Wasatch County Hospital, local doctors, dentists, and specialists from outside the valley.

The Health Fair offers, for \$15, a blood chemistry screening which includes tests for cholesterol and lipoprotein levels, prime factors in heart attacks. Other screenings include free tests for glaucoma, hearing impairment, oral and skin can-

cers, breast examination, blood pressure and vital capacity (breathing) testing. An \$8 off coupon is being offered to all women wishing to schedule a mammogram at Wasatch County Hospital.

There will also be a blood bank drawing by the IHC Mobile Unit during the day and blood typing can be determined, for those requesting it, at the same time. Lectures on various health-related topics, including slide presentations, are also scheduled throughout the day. Child fingerprinting, drawings for door prizes, and food booths are some of the other activities included during the day's activities.

Wasatch County Hospital Home

Health Is In Its Fifth Year of Service

4-6-88

Home Health, offered through Wasatch County Hospital in Heber City, is now in its fifth year of service to the citizens of northeastern Utah and, during that time, has seen the services it's able to offer grow and expand.

According to Kim VanWagoner, R.N. and director of Home Health, those things that were offered when the program began in 1983 included skilled nursing, physical therapy, speech therapy, occupational therapy, home health aids, personal care aids, and homemakers.

"Home Health care was designed

to give patients with a non-life threatening illness a chance to stay in the privacy of their own home and receive medical attention," VanWagoner said. "It's a real benefit to the community to have this service available to them. It has been found that when many patients are allowed to stay at home they heal faster, both emotionally and physically."

Some of the new services that have been added since 1983 include home intravenous therapy, Lifeline (this is part of the Senior Life Club offered by all IHC hospitals to homebound patients), Hospice (the

care of the terminally ill), Social Services, respiratory therapy, and laboratory service.

"The programs we offer are not geared just for the elderly, but cover the whole lifespan of ages," VanWagoner said. "And the Wasatch County Hospital Home Health Agency care is accepted by Medicare, Medicaid, and all of the insurances that pay for home health care."

To obtain home health care or information about those services, please contact VanWagoner at Wasatch County Hospital Home Health, 654-2500, ext. 263.

Journal
